12 County Service Area

Our Service Area encompasses Alcona, Alpena, Cheboygan, Chippewa, Emmet, Iosco, Otsego, Oscoda, Mackinac, Montmorency, Presque Isle, and Luce Counties.

Challenges of our Service Area Population

The population of patients in our Service Area face serious challenges for healthcare access due to widespread economic and social deprivation, joblessness, underemployment, geographic isolation, harsh climate, and lack of transportation and other resources.

Further, patients in our Service Area statistically exceed the State of Michigan for adult obesity, proportion of adults reporting diagnosis of high blood pressure, and age adjusted deaths from diseases of the heart and diabetes.

served

30,300 Patients

in the 2018 calendar year.

97,309 people or roughly 39% of residents in our Service Area are individuals who are under 200% of Federal Poverty Level guidelines, underinsured or uninsured, or receiving Medicare or Medicaid benefits.

Due to this, Alcona Health Center recognizes the importance of offering a full array of services including health education, eligibility screenings, care management, care coordination, and community resource referrals.

PATIENT CENTERED MEDICAL HOME

Alcona Health Center is a Patient Centered Medical Home.

The Alcona Health Center team of medical, dental, behavioral health and pharmacy professionals work with our patients to establish and manage their health goals and assists them in achieving the best possible health. Patients who need some extra one on one support can access our Care Managers and Community Health Workers who are available to lend a hand. As a Patient Centered Medical Home, access to care, care coordination and patient support are key components to the quality of care we provide.
