spnkla Counterfeit Purchase: Known

Next we would like to ask some questions about product counterfeiting. When we say product counterfeiting, we are not talking about money or false documents such as passports or driver's licenses. Instead, we are talking about fake consumer products, such as handbags, watches, sports jerseys, sunglasses, electronics, and medicines.

Counterfeit products can be deceptive in that a consumer may think they are buying a real product when they are not. These counterfeit products can also be non-deceptive where a consumer knows or is quite sure that they are fake.

Have you ever intentionally purchased a product you knew was a counterfeit product such as luxury handbag or team jersey?
