alum01 Alumni: Funding Increase

The next few questions are about higher education in Michigan.

As you may know, Michigan's four-year public universities receive funding from the state government to support higher education. The State Legislature and the Governor determine the amount of funding the State will provide each year.

To what extent do you agree or disagree with the following statement:

'The State of Michigan should increase the amount of government funding it provides to four-year public universities.'

Would you say that you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with this statement?

%	N	VALUE	LABEL

alum03

Alumni: Funding Change

In 2001, the average cost of a year at one of Michigan's four-year public universities for an in-state student was about \$11,600. This amount doesn't include room and board, and it has been adjusted for inflation. Part of this cost is paid as tuition, and part is paid for by the state government.

On average, what percentage of the total cost per student do you think came from state government funding in 2001?

alum05 Alumni: Restore Funding

State government funding for four-year public universities in Michigan has decreased by about 50% since 2001. Right now, a university like Michigan State only receives enough from the state government to operate for 88 days a year, with the remaining money coming from tuition, grants, and other sources.

To what extent do you agree or disagree with the following statement:

'The State of Michigan should restore the amount of government funding it provides to four-year public universities.'

Would you say that you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with this statement?
