# COVID-19 Vaccine: Where We Stand Now

- As of Jan. 26, 1.47 million vaccines allocated to MI
- State goal: 50k or more shots/day
- 760k administered; remaining scheduled
- Biden Administration goal: 1.5 million shots/day
- MI still currently vaccinating 1A, 1B and 65+
- 1800+ providers enrolled but supply limited

Phase	People covered	Dec	Jan	Feb	March	April	May	June	July	Aug	Sept	Oct	Nov	Dec		
1A	Healthcare workers	[Green bar]														
	Long term care residents and staff	[Green bar]	[Green bar]													
1B	75 years and over not covered in Phase 1a	[Green bar]	[Green bar]													
	Frontline State/Federal responders	[Green bar]	[Green bar]													
	School and child care staff	[Green bar]	[Green bar]													
	Corrections staff	[Green bar]	[Green bar]													
1C	Other essential frontline workers	[Green bar]	[Green bar]	[Green bar]												
	65-74 years old	[Green bar]	[Green bar]													
	16-64 with COVID-19 risk factors/pre-existing conditions	[Green bar]	[Green bar]	[Green bar]												
2	All remaining essential workers	[Green bar]	[Green bar]													
	16 to 64 years not covered above	[Green bar]	[Green bar]													

# MI vs the Nation

- MI now ranks 15th of 50 states in % of vaccines administered per 100k people – up from bottom ranks

Total Doses Administered Reported to the CDC by State/Territory and for Selected Federal Entities per 100,000

# Hospitals' Role

- **57%** of MI vaccines administered by hospitals/health systems
- All large systems *could* do tens of thousands a week, if supply existed.

# Ongoing Challenges, Partnerships

- Supply, supply, supply
  - Some hospitals have gotten no vaccine since Jan. 4
- Vaccine hesitancy does exist
- Variation in providers' capacity, desired roles
- Role of partnerships:
  - Hospitals and local health departments are primary vaccinators
  - Depending on geography and capacity, these partnerships are often strong but sometimes challenged
  - Other providers' desires to assist is needed but also complicates the process

# Health Policy Implications

- What are provider groups' roles in the next crisis?
- COVID spotlight on Michigan's (and US) disinvestment in health infrastructure. **Where will we invest to better prepare for the next pandemic?**
  - Mental health/addiction services
  - Public health
  - Vulnerable populations/**health equity**
- What should we do to nimbly adopt regulatory and policy solutions next time?
- What will change short- and long-term in care delivery to improve access?
- How will Michigan's emergency planning change to recognize we no longer operate in siloed regions?
